Setting Tournament Types

Open: Tennis Tournament Planner

Go to: 1) Tournament Properties
        2) Then Info Tab
        3) Then Tournament Type

It has become very important that:

a) You set the tournament type properly
b) You instruct anyone using a TP license in your province to set the field properly.

Here are the settings:

National: Don't use it. It is for national events.
Provincial: Use it for all PTA Sanctioned events.
Regional: This is mostly for Quebec's regional events.
Community: For non-sanctioned Community events
Club: For non Sanctioned Club Events
Recreational: For non-sanctioned Recreational events

Why does it matter?

Because: PTA members are allowed to play in an unlimited number of events at any level.
Because: Recreational Members are allowed to play in as many events as they want - but not at the regional or above level.

So, if you, for example, were to set an event as a Community level event, anyone could enter it by grabbing a free recreational membership.

Also, if clubs start running lots of club tournaments with VR, we do not want them cluttering up the Tennis Canada site - which will be set to filter only to tournaments Regional and above, by default.
